Early cancer diagnosis and community pharmacies in deprived areas (CoPECaD) national survey

Dear Community Pharmacy Staff member,

We are writing to invite you to take part in a national online survey. This is an NIHR funded research study being conducted by researchers at the University of Exeter Medical School.

We are interested in learning more about the usual practice of customer-facing community pharmacy staff regarding your experiences of asking customers about their symptoms when they seek over-the-counter treatment for symptoms which may be potentially related to cancer. We are interested in exploring barriers to such practices and in examining how your pharmacy setting (for example rural/urban) and other characteristics might affect your usual practice.

Your responses will be confidential and anonymous, and you will have the chance to be entered into a prize draw for one of ten £50 vouchers on completion of the survey. **If you have already completed this survey, please ignore this letter and we would like to say thank you for your valuable contribution.**

Please click on the following link or QR code to learn more about **CoPECaD questionnaire** and to participate:

https://exe.qualtrics.com/jfe/form/SV_5aMvo11mJEBm3ae

We want to thank you in advance for your participation.

Kind regards,

A handwritten signature in black ink, appearing to read 'Judit Konya'.

Dr Judit Konya (Principal Investigator), on behalf of the research team
